

Buildings and Grounds

Our 2020 season presented us with a few bumps in the road - but ones that were completely manageable and it allowed us to keep that road smooth.

They included the following:

- Our Upper Pool had a valve that needed some attention. What we thought might've been the entire filtration system - was a simple valve adjustment. This saved us thousands of \$'s this season. While this filtration system will need to be updated in the future - she still has a few good years left.
- In light of our shortened season and in an effort to save our resources, our lawn care was cut back to twice/month. Sharp Landscaping does a fabulous job keeping our grounds clean.
- The women's bathroom received an upgrade in the off-season and welcomed us to the summer of 2020.
- The little pebbles down by Courts 7&8, have slowly been removed this summer. Our goal is to have some nice plantings in that area for us to enjoy next summer.

We are looking forward to other improvements around the grounds in the off-season to get us ready for our 2021 season.

We greatly appreciate your membership in the 3Chopt family - we couldn't do it without your support!

Please feel free to reach out to any member of the board if you should you have a comment or concern.

Sincerely,

Heather Heishman
